

17th July 2008

TRIMEGA LABORATORIES LIMITED
("TRIMEGA LABORATORIES" OR "THE COMPANY")

HAIR ALCOHOL TESTING EXPORTED TO US

The Board of Trimega Laboratories, an international supplier of substance misuse testing products, is pleased to announce the the first overseas license granted for the use of its Hair Alcohol Test (HAT).

London-based Trimega Laboratories has issued the licence of its patent pending HAT to Consumer Genetics in the US which is poised to launch its services to the relevant legal, medical and professional markets. Consumer Genetics is also targeting the worried parents of teenagers with a version of the test that relies on a home sample collection - AbuseCheck™.

Having already introduced the world's first gender pregnancy test and a revolutionary DNA asthma test, Consumer Genetics has built a strong reputation for bringing new technology to market. Its marketing director, Terry Carmichael, has been credited with pioneering direct-to-consumer genetic testing by placing the first human DNA testing product (Home DNA Paternity) on the shelf in major pharmacy chains.

The deal means that Trimega Laboratories gains a stronger foothold in the growing international market for substance misuse testing products which, up until now, it has been supplying remotely from the UK. Earlier this year a Canadian, William Holowaychuck, was given the go-ahead for a liver transplant by overturning a previous medical decision with the help of a Trimega HAT which unequivocally proved his abstinence throughout the preceding year.

---ENDS---

The Directors of the Issuer accept responsibility for this announcement.
